Smoking is injurious to health yet it is difficult for any smoker to altogether quit smoking. Smoking definitely gives immense pleasure along with a habituated smoker finds it almost impossible to quit smoking even when his health is failing. That's the reason a number of smokers these days are switching to electric cigarette. Asaro, the industry delightful electric cigarette, takes away the damaging elements from the cigarette yet keeps the pleasure part thoroughly intact. Thus by smoking an electronic cigarette you can stick to your smoking sticks and yet save your lungs & heart from long-term damages.

Statistics claim that every smoker is aware of the possibility harm that he's self-imposing on his body by inhaling those toxic fumes. In fact, over 95 percent of smokers also provide a serious thought to quitting smoking chiefly for health-related reasons. But when you are into full-time smoking them you will concur that letting go of this addictive habit is something that is not easy. Thus, a smoker goes on smoking understanding that he is inviting disease and death. The effect that the aroma of cigarette creates is very seductive and gives the person a higher. Hence, he keeps breaking promises made to himself and continues his chain smoking.

Safe smoking: Because of the myriad demerits of smoking, the manufacturers came out with a safer alternative in the form of electric cigarettes. An electric cigarette gives the same aroma, that delightful pleasure without producing the poisonous fumes. So, should you switch to electronic cigarettes, you can continue your smoking habits without disturbing the functioning of your vital organs. By producing aromatic steam, rather than toxic fumes, a digital cigarette paves method for a conducive and safe form of smoking.

Thus the merits of electric cigarettes discussed so far can be summed up as:

â€¢ Safe, fume-free smoking

â€¢ Provides the same level of pleasure like a conventional cigarette

â€¢ Eliminates chance of lung diseases by not producing noxious fumes

â€¢ Manufactured by companies using today's technology to ensure safe smoking

â€¢ Recommended by physicians and experts

Eliminates passive smoking: Asaro electric cigarette also eliminates any risk of passive smoking. Since these cigarettes do not produce deadly fumes and lethal smokes, the folks round the smoker don't get affected. Hence, cardiovascular or lung diseases because of passive smoking is completely eliminated as well.

A lot of electric cigarettes: Electric cigarettes differ from the conventional cigarettes in terms of functioning. These user-friendly cigarettes don't use the concept of combustion of tobacco but depend on formation of smoke utilizing a battery steam. Thus, actual burning of tobacco doesn't occur at all. Rather, electric energy is used to create aromatic steam. Hence, all of the toxic materials & fumes as a result of burning of tobacco (as with a regular cigarette) are removed.

The chief reason an electric cigarette is known as "e-cigarette"™ is due to its identical resemblance to the harmful counterpart. Also, these electric cigarettes can be found in various flavors and also vary in

nicotine strength.
