Article published on April 23rd 2012 | Health

Electronic cigarettes are the latest buzz among the smokers all over the world. If the people look at these electric cigarettes, they will not find any difference from the outside. Actually, the difference is in their components because these innovative electric cigarettes contain no damaging substances. If you go by the electronic cigarette reviews, these are manufactured so that the heavy smokers can quit the smoking habit gradually since quitting the habit of cigarette smoking is very tough.

These electronic cigarettes provide the smokers with the similar experience, which they would get from smoking tobacco cigarettes but without giving the harmful nicotine in their body. On the other hand, the e-cigarettes produce vapor instead of secondhand smoke, which tobacco cigarette produce. According to the electronic cigarette reviews, the people who are constantly using these nicotine free cigarettes, can lessen the nicotine in there body which in turn help the smokers to get rid of smoking habit as everyone knows that cigarette smoking is injurious to our health.

Keeping the fact in mind that the e-cigarettes are getting popularity day by day, a variety of mini electronic cigarettes have launched in the market. These e-cigarettes are the smallest as well as compact and convenient cigarettes in comparison to the previously launched electronic cigarette variety. These small e-cigarettes are priced approximately between $39.95 and $79.95 per kit. These e-cigarettes are available in varieties of flavors. In addition to this, the level of nicotine varies extensively, for instance, zero, low and medium as well as high. Their kit generally has 2 mini e-cigarettes along with lithium batteries, their charger and adapter as well as nicotine free cartridges and above all, the manual of how to use them.

The electronic cigarette are usually consists of a plastic and or metal tube. Most of the e-cigarettes that are available in the market in the recent times are like the traditional tobacco cigarettes, although these may be available in different assortment of colors. The smokeless electric cigarettes have two parts; first one is the long cylinder the end of which has a battery in order that it appears the paper end of a usual tobacco cigarette; the second part consists of the cartridge, which contains the nicotine, water and flavors, as well as the atomizer. The atomizer is nothing but the heating element, which helps the water to vaporize and then mixes it with the nicotine along with the flavor so that the vapors are produced and the smokers inhale this vapor.

These innovative electric cigarettes do not produce burning heat as well as ash as they do not burn. There are mainly three reasons for which the electronic cigarette are so much popular among the people all throughout the world. First of all, these are healthier to use since the toxic chemicals that are ingested are reduced in great extent. Secondly, these cigarettes do not generate first or second hand smoke; therefore no question of smoking bans and they are affordable at a reasonable price.
