For Women Face Elimination by Tedd Woods

Article published on March 19th 2012 | Health

For women, their face is one of the most important parts of your body. Almost all women should take care of your face daily. Make-up, lips, eyebrows, face powder and other cosmetic things girls who use their face that they look nice and beautiful.

However, how it feels when your face is different from other girls? Facial hair is so ugly and messy, but why facial hair grow? The answer is simply genetics. It runs on blood, so if your mother, grandmother or any of his family clan facial hair mustache), then perhaps children will be the same. Another reason for polycystic ovary syndrome. This condition is almost 10% of women of reproductive age and one of its symptoms is excessive hair growth. However, not all with PCOS had a lot of hair growth. In some cases, excess hair does not look on his face, but on the upper lip and chin. Menopausal women tend to develop facial hair due to hormonal imbalance.

Then you will be asked whether there are any remedies to this problem? Yes, there are remedies. There are different types of treatments that are available from the facial hair, but some are painful and expensive. There are also options that can be used to get rid of facial hair. This may help, but we can not guarantee 100% result.

First Bleaching - whitening kit can be in supermarkets, which can be used without the pain, but be careful with the irritation that it can do for your skin.

Second Shaving - this is a great choice because men also use their facial hair, but your face looks darker and thicker.

Third Tweezing - this can be done at least once every two weeks, but you must resist the pain for about a minute.

4th Depilatory creams - the treatment is painless and easy to administer. Just the part where the hair grows and after a few minutes, wipe with a clean cloth, but you should avoid using it near your eyes. The cream can also irritate your skin and burned his face reddening of your skin.

5th Waxing - is one of the most widely used methods of facial hair. Hot wax was applied to the hairy area, and that when it cools it will pull off. When you pull off the wax hair will follow, but this procedure is painful. This can be done at home or cabin.

6th Electrolysis - the procedure is done by sliding a needle into the skin that cleared the hair side. A short zap of electricity can kill your hair roots, then the hair can be pulled out with tweezers. This is a painful procedure and should be carried out professionally.

7th Laser hair removal - the most expensive treatment, but it can only be done in one session. Unlike other procedures, the laser is not painful.

So now that you understand the different options, your task is to find the right solution to your problem.
