Article published on April 17th 2012 | Health

Cosmetic dentistry is one of the latest branches of dentistry. Cosmetic dentistry involves the usage of various innovative technologies and modalities for the overall improvement of the facial aesthetics of a person. For years orthodontic treatment has been associated with long duration of treatment, pain and obscene metallic wires jutting out of your mouth. These reasons were enough to drive away people from orthodontic treatment. It was considered as some kind of torture until Invisalign was introduced. But what is Invisalign? Invisible alignments are the two words that constitute invisalign. The modality utilizes invisible aligners for the orthodontic treatment. It consists of clear removable alternative to braces made with clear thin medical grade polymer. So the braces are invisible flexible, removable and absolutely hassle free.

Important features of Invisalign are,

1. Wires are absent so no retention of food particles or plaque inside mouth.

2. No injuries of the soft tissues of mouth like tongue and gums as sharp ends of metallic wires are missing.

There are several other facets of dentist in Encino as well. They believe in holistic dental care in perfect harmony with nature and human body.
