How IOC provides the quality Teleradiology Services by [Justin Bayer](#)

Article published on March 21st 2012 | [Health](#)

Imaging On Call is a U.S. based, Joint Commission accredited, radiology services provider. We provide various services like Radiology Staffing, Subspecialty Support, Financial Resources, Administrative services, Daytime Radiology Reading Services and Teleradiology Services. Nearly all of our radiologists are US based except for three, who are US trained but choose to live abroad. Because our radiologists are largely US based, Imaging On Call is readily available to provide quality final reports.

A name everyone trust. Imaging On Call is a division of RadNet Inc., an outpatient diagnostic-imaging facilities owner/operator that started in 1980. RadNet is currently responsible for more than 230 centers across the nation, with a staff of over 5,000 employees, including 500 radiologists. At Imaging On Call, weâ€™ve been serving radiology departments like yours since 2002. We are strongly committed to patient care and industry leading customer service and this is what sets Imaging On Call apart from the competition.

As providers of Teleradiology we try to create a balance between preparedness and efficiency, so that your time is used in the best possible way while maintaining the highest standard of medical care. Imaging On Call provides various teleradiology solutions to our clients which provide valuable benefits like cost reduction and increased productivity.

IOC helps with radiology staffing. This helps you save time and resources on staff augmentation. We help in recruiting the right radiologists and the right number of radiologists required on site.

With our Subspecialty support we deliver higher quality care. To achieve this we need the ability to thoroughly read images and read them fast. This can only be achieved by having onboard extensive subspecialty expertise. To achieve all this we have a network of subspecialists who are board-certified and joint commission accredited radiologists from various fields of diagnostic and interventional imaging. These radiologists work very closely with our 50-plus teleradiologists to cover you for subspecialty readings any time during the day or night.

IOC also provides support for Capital Improvements. You want to acquire new modalities or you want to expand your facility we are there to help you.

Our Administrative services lighten the load on your staff by using our Radiology Administrative Services.
