Hydroxatone - the Undisputed Choice when it Comes to Skin Care by [Pariswilliams](#)

Article published on February 2nd 2012 | [Health](#)

Hydroxatone is easily the one of the most popular of all anti wrinkle creams available in the market today and with a good reason. Women and men affected by the symptoms of an ageing skin such as lines, dark spots and wrinkles find that no other product delivers results as effectively as this scientifically advanced formulation.

It is the inherent desire of all women and of men to look young and attractive to others. However, factors such as stress, pollution, improper diet and eating habits and lack of proper sleep all contribute immensely to the deteriorating condition of your facial skin. Incessant exposure to the sun's UVA and UVB rays is another reason why skin loses its sheen and tautness.

â€¢ A Product Developed by Experts Using the Best Ingredients

Hydroxatone anti wrinkle cream is co-developed by a plastic surgeon backed by the best brains in the beauty and skincare industry. Years of relentless and intense research has gone into identifying the perfect ingredients for this highly effective anti wrinkle formulation. The product is clinically proven to minimize the appearance of fine lines and reduce the appearance of wrinkles.

Lack of skin hydration is identified as one of the prime reasons why the skin develops wrinkles and slackens up. As we age, the production of naturally occurring collagen in our skin cells gets reduced leading to decreased hydration. Loss of suppleness and softness is a direct consequence of this action. Hydroxatone has ingredients that help increase skin hydration by over 20 percent. It works across all age groups and delivers results in about 88 percent of the users.

The active ingredients are designed to improve skin tone and radiance, necessary to make sure that your skin looks young, smooth and supple. With regular use, the skin texture undergoes gradual improvement. Even the deep wrinkles present in the forehead area show signs of diminishing.

â€¢ Proven Ingredients Deliver Visible Results

The presence of proven and effective ingredients such as Matrixyl 3000 and Argireline makes this advanced formulation one of the best skin care products available in the market for ageing skin. Women love the fact that they don't have to put up with the inconvenience and pain of invasive treatment methods such as Botox and plastic surgery.

According to Hydroxatone reviews, the formulation also includes Hyaluronic Acid which is virtually unmatched in its ability to keep the skin hydrated. They play an instrumental role in keeping the skin smooth, soft and youthful. There are also ingredients such as SPF 15 which keeps the skin protected from harsh sun rays.
