Incident investigation and safety talks

If you have your own company or are a manager in a large firm then you know how important it is to ensure the safety of all the staff which work for you. With the current health and safety that is outlined by the HSE it is becoming increasingly important to managing the health and safety of both your staff and the environment that they work in. This article is aimed at explaining the importance of health and safety in the workplace along with giving help and guidance on courses such as the IOSH Managing Safely e-learning which can lead you on your way to obtaining your NEBOSH General Certificate.

The importance of incident investigation

You may question the need for health and safety in the workplace but it is a well known fact that most of the injuries and possible deaths that occur in the workplace each year are as a result of companies having poor or incomplete health and safety guidelines and procedures. I know this sounds very cliché but these health and safety guidelines really can be the difference between life and death. Health and safety is a very vital and necessary for you and your workplace. There are many e-learning modules on the internet that can help you to achieve up to date health and safety for you and your managers; one such course is the IOSH Managing Safely course.

What is the IOSH Managing Safely Course

The IOSH Managing safely course meets government's guidelines for health and safety training and also covers the following topic areas for Incident Investigation:

- Working Safely

- Identifying common hazards

- Defining Hazards and risks

- Improving safety performance

With the ability to learn this course online, you can instantly become up to speed and on your way to achieving your NEBOSH General Certificate. This course is a really important addition to any companies health and safety routines and it can really offer that additional practical and pragmatic approach that your company needs. If you are interested or you would like more information on IOSH products then this can be found by entering the keywords "incident investigation" into an internet search engine.
