Article published on March 10th 2012 | Health

We all know that we face is the most valued and monitored the function of our body. Our face is always the first part of the body, which is observed in the other. Men grow a beard and mustache, and the women - no hair on his upper lip would not be normal or may be very inconvenient. This is annoying because it makes us feel uncomfortable and reduces our confidence. Everyone, especially women bothered too much unwanted hair on your face. Most people shave or pluck their hair to get rid of it. Today, laser facial hair removal is to help those in need.

Laser hair removal can be used in people with light skin and dark hair. This is often not advisable for people with dark skin because it can not produce positive results. Laser hair removal works best for people with fair skin types. It would be difficult to do on darker skin and can not provide optimal results. People with dark skin should get a laser facial hair removal and radio frequency have better results in combination.

Laser surgery only takes about 15-30 minutes, because a small amount of hair removed. For the eyebrows, for example, this procedure will take about 4 to 6 sessions, better hair reduction results. Although laser surgery to remove facial hair is expensive, it is worth the effort and money. Visit ranging from $ 200 - $ 900 per session, depending on the part of the body and its consistency.

The pain is bearable laser surgery, compared with the picking. It feels a little hot, as the actual laser procedure and snapping gum as a tingling sensation. Darker and thicker hair, the more painful it gets.

There are risks of laser surgery to remove facial hair. Eyebrows face section is considered the most risky, because it is close to the eye. With this laser surgery procedure eyebrow requires that patients use eye shields to keep both eyes closed during the procedure. Good thing is, is a rare opportunity to scarring using laser surgery.

The bottom line is that the laser facial hair removal works best on those with light skin and dark hair visible. You should really think twice, if it is really what you need, depending on your skin color. But for those who are lucky to have light skin and dark hair visible, laser facial hair removal is the cheapest way to reduce from 40% to 80% of facial hair. Laser facial hair removal is also advisable, since it requires less treatment schedules than by electrolysis.
