Laser Hair Removal in Salt Lake City to Permanently Get Rid of Hair Growth by [Allan Leider](#)

Article published on December 10th 2011 | [Health](#)

Laser hair removal treatment is a treatment that can permanently reduce unwanted hair. For individuals that are bothered with continuous shaving or waxing, or have hair on the back or face, which tends to lower the self-confidence of the individual, it is a treatment that is giving them their confidence back, and freeing them from the pain of shaving and waxing. There isn't a time of the year that unwanted hair doesn't affect us. During the summer months, we lack the confidence to be on the beach or at the swimming pool, and during the winter months, we avoid the shaving or waxing, and begin to lose the sex appeal that many of us desire.

Laser hair removal is a safe alternative to shaving and waxing and the results are much more predictable than techniques such as electrolysis. Laser hair removal treatments are removing hair from all parts of the body which include:

- Buttocks

- Back

- Shoulders

- Arms

- Pubic area

- Legs

- Underarms

- Chest

- Neck

- Chin

- Upper lip

Any part of the body that hair is growing, the hair can be removed with laser hair removal treatments.

There are many reasons that individuals begin to grow unwanted hair in different areas of the body which include:

- Hair growth due to age

- The genetics of the individual

- The individual experiencing hormonal changes

- The individual taking certain medications

What are some of the reasons that individuals seek permanent hair removal? There are many reason that an individual may seek permanent hair removal, but the most common are listed below, and include:

â€¢ To eliminate or reduce odor and improve hygiene

â€¢ To stop rashes and burns that occur after shaving or waxing due to sensitive skin

â€¢ The individuals hair is too dark and is too contrasting to their skin

â€¢ The individuals hair grows at a rapid pace

â€¢ The individual's hair is too coarse

â€¢ The individual's hair growth is in unwanted areas, such as the face, or chest of a woman, or the back of a man

â€¢ Laser hair removal treatments are convenient in comparison to constant shaving or waxing

â€¢ The lifestyle of the individual, such as being a bodybuilder or a bicyclist How does laser hair removal work?

When laser hair removal treatment is performed, the treatment targets the hair follicle with energy. The follicle is heated, and the effects are that it is no longer able to produce hair. The only effect the laser treatment has is on the follicle and all other tissues are not damaged. Many are choosing laser hair removal as a convenient means to remove their hair. For both men and women, it is a solution which makes them feel good about their body, once again, and provides them with the confidence that they need enjoy their body.
