Laser hair removal: Remove unwanted hairs from any part of your body by [Edmund Brunetti](#)

Article published on June 5th 2012 | [Health](#)

Are you sad owing to growth of unwanted hair? Are you suffering from hair growth in undesirable body areas? Then why not try laser hair removal? Laser hair removal is a simple, effective and painless form of removing excess or unwanted hair from any part of the body. It is a painless hair removal process that has become exceedingly popular in today's era. People of all ages are opting for this form of hair removal to permanently eliminate hair from face, bikini line, chest, legs and even hands. No matter how thick is the hair growth and no matter in which part of body has the hair grown, they can be easily and painlessly removed using laser treatment.

Why to opt for laser hair removal: When you experience hair growth in undesirable areas, it can get really depressing and even embarrassing. Imagine a strand of hair growing out of your ear or nose! Won't you like to hide that hair or better remove it? While shaving and waxing are cheap alternatives, they do not cause permanent removal of hair. You can pluck or shave but that hair will be back in no time. Hair removal through laser treatment is the only way of ensuring that the hair is completely removed and on a permanent basis.

Areas covered: Through laser hair therapy, hair can be removed from any part of the body irrespective of your age or gender. Men usually opt for hair removal from ear, nose, legs or back while women usually opt for removal of unwanted hair from face, upper lip or bikini line. But this form of treatment is applicable to any part of the body as per your individual need.

Benefits of laser hair removal: Laser hair removal is a scientifically proven and completely safe method. It has been approved by the medical society and is one of the recommended ways of hair removal. A boon of medical science, it has become one of the most popular methods of hair removal in recent times. Some of the other benefits are discussed below:

- i. Painless: Hair removal by laser is a completely painless process. Most other forms of hair removal cause pain. For instance, waxing, threading, plucking, etc cause immense pain. But laser hair elimination causes not even the slightest of pain. On the contrary, the patient feels a pleasant sensation on the skin as the laser light is grafted.
- ii. Permanent hair removal: In this form of hair removal, the hair follicle is completely damaged so that hair does not grow back again. Thus, it is one of the most effective and 100% permanent solution for removal of unwanted hairs.
- iii. No side effect: This is a painless form of hair removal which has no side effects. However, it is recommended that you get the treatment done under the deft hands of a recognized surgeon.
- iv. Not very expensive: It is a wrong notion that laser hair removal is extremely expensive. This painless hair removal process is becoming cheaper to render it affordable for the masses.
