The prostate is a gland that is located under the bladder and has an important role in:

â€¢ Proper production of semen

â€¢ Male health

â€¢ The flow of urine

Prostate cancer is on the rise and continues to be one of the most common cancers among men. Therefore, Health Plus Inc. encourages regular check ups with a medical physician. Vitamins and supplements can help fill crucial gaps and improve the quality of life for people of any age. Here are 10 vitamins and supplements that you should get to know. If at any time you experience urinary hesitancy, urinary dribbling, urinary retention, pain with urination, pain with ejaculation, lower back pain, and/or pain with bowel movements, it may be in your best interest to set a doctor's appointment for a PSA (prostate specific antigen) test. The PSA test will determine if there are any cancerous cells associated with the prostate.

Key Ingredients

Saw Palmetto Extract (berry) (Serenoa repens)

A small palm tree, with berries and leaves, indigenous to North America. Saw Palmetto berries have been written about as a familiar remedy for prostate health in herbal medical literature since the 1800's. By the 1970's, clinical studies in Europe were proving what herbalists had known for years. Saw Palmetto can be used for prostate support. A German study, over a three year period, showed significant improvement in 82% of the 315 patients with prostate symptoms. Some of the fat soluble active compounds in Saw Palmetto berries that have a beneficial affect on the prostate are free fatty acids, phytosterols and monoglycerides. A standardized extract that contains 45% fatty acids and sterols is the most beneficial form.

Pygeum Extract (bark) (Prunus africanus)

An evergreen tree found in Africa. Extracts from the bark contain several chemical compounds including phytosterols which have anti- inflammatory activity that promotes healthy bladder and prostate function.* Pygeum Extracts have been used in France for the last 25 years to support prostate health. The synergistic combination of both Saw Palmetto and pygeum may have a more beneficial effect on prostate health. When used correctly, vitamins and supplements can address specific needs and enhance your overall wellness. Find the best deal of Discount vitamins and herbal supplements at A2z Discount Vitamins.

Hawthorne Extract (Crataegus oxycantha)

Recognized for its high concentration of flavonoid compounds, known as proanthocyanidins, that are primarily responsible for its free radical scavenging activity. Hawthorn extract may be helpful in promoting healthy blood pressure and cholesterol levels. The flavonoid compounds have been shown to strengthen coronary vessels which may enhance the smooth flow of blood into the arteries as well.

Nettle Root Extract (16:1) (Urticae diocia radix)

Supportive in maintaining healthy bladder function. It is a nourishing herb rich in minerals. Nettles has a mild water releasing action and aids the kidneys with elimination of uric acid.
