Read simple meditation guides on how to meditate for beginners? by [Rockeysheen01](#)

Article published on December 13th 2011 | [Health](#)

Meditation processes have become very popular all over the world as large numbers of people have gained from them. But still the most common question that is asked by many people is “How to meditate for beginners?” For many people meditation seems to be a very easy process, but it is not so. There are gradual steps in meditation and one has to cross each step one at a time. Meditation for beginners is probably the most difficult stage among all as in this it is taught to get control over the mind and the body slowly. The human mind is the most restless thing on earth and it is very difficult to bring it at a point of focus and concentration with meditation. There are many guides and books available that can provide ready tips on how to meditate for beginners. Following the instructions can help you meditate in a great way and you can recover from all kinds of tensions and stresses.

There are some simple things that need to be followed by people who are looking for answers to how to meditate for beginners. These are as follows:

• Look for a proper place to meditate. You can meditate at any time of the day, but early mornings have proved to be the most effective time for meditation. Choose a place that is open or well ventilated. If there is an option, go to the terrace or a park. The fresh morning air is good for health anyways. Meditating in a serene and fresh environment is best.

• Make sure the dress you wear is comfortable. Do not wear very tight fitting clothes as that might be problematic. Comfortable clothes can help in maintaining correct meditation postures as well. This is also a very important part of how to meditate for beginners.

• Try and sit upright with an absolutely straight back. This is the correct posture for meditation. However, do not over stress yourself in doing that. It is very important that you relax with meditation and any kind of strain on the body will hamper in the meditation process. Beginners of meditation are told this again and again.

• Breathing exercises are probably the most common things that are told to people who look for how to meditate for beginners. Controlled breathing is practiced and that helps in relaxing the mind and the body at the same time.
