Restylane – Best Dermal Filler by Cosmetic Surgeons [Julia Roger](#)

Article published on May 11th 2012 | [Health](#)

Over the past few years, dermal fillers have been in quite a high level of attention from different parts of the society. Majority of people who are in their mid 40s mainly require it to prevent the body from ageing. With the popularity of cosmetic treatments growing higher and higher, such fillers have become common option for treatment experts.

Restylane is considered the safest dermal filler available until date. In fact, Restylane is quite common among the cosmetic surgeons. This particular dermal filler is made from Hyaluronic acid, a substance that is naturally found in body. As a result, when Restylane is injected, the body faces no negative impact. It suits the body quite positively.

Restylane is normally used for removal of skin wrinkles. They are immense help once being injected on the face to remove those wrinkles. The usage is very similar to Botox but Restylane is longer lasting as well features for lesser side effects. The chances of negative allergic reactions are very less. Acquiring any sort of animal-prone diseases is simply out of question. Pre-testing chances get reduced.

In fact, US FDA has approved the use of Restylane for skin treatment purpose. The effects majorly last for 8-10 months. This is a bit more when compare to other dermal fillers that lasts a maximum for 6 months. Restylane is very effective in eliminating the deep skin creases as well facial wrinkles & lines on cheeks or even around lip region.

Be it Restylane or any other dermal filler, they are effective to enhance the appearance of lips. Injecting fillers, help in providing a much sensuous and pouted look to the lip. In addition, when Restylane is used, then the effect lasts fifty percent longer than any other cosmetic filler available in the market.
