Nowadays, people are very conscious about their look and personality. Every one wants to look good and stylish. To accomplish this deed, they use every beauty and styling tips. But most of them don't care about the unwanted hair of forehead, hand, forearm and other visible parts of body. These unwanted hairs hide your entire beauty and make all your efforts waste. But now you don't need to worry about the unwanted hair. Through laser hair removal, you can get rid of them without any painful experience.

There is another popular method of removing hair and that is waxing. But some people have very painful experience of it and don't want to bear it anymore. Moreover, it removes hair only for 2 to 8 weeks. So this is not a permanent solution of unwanted hair.

Laser hair removal has proven a handy to those suffered people. It is a non-invasive, convenient way to permanently reduce unwanted facial or body hair. Hair removal or epilation by laser has become very popular after year 2000. Since then many machines has come into the market as the understanding of skin and hair increased.

Laser works by passing a beam of light through the skin and depending on the wavelength different chromatophores are targeted. Hair removal can be done from any part of the body like Face, chest, Neck, Arms, Axilla, legs and bikini area. Depending on the area of the body involved, it takes from several minutes to several hours.

Advantages of laser hair removal:

- 1) Ease of use- it is very easy to use and safe for the patient.
- 2) It consumes less time in comparison of other methods.
- 3) Hair re-growth after a year.
- 4) No side-effects.

Disadvantages of laser hair removal:

- 1) A little expensive as compared to other treatment.
- 2) Does not work on white and blond hairs.

Although laser hair removal is the best method to remove unwanted hair yet it is not a fully permanent solution. Hair will grow after a year. Nevertheless it is very popular, recognized and result oriented method among other methods. The only other method is electrolysis. The main disadvantage of electrolysis is that it is time consuming and can cause burns in the skin if not done correctly.
