Scoop on the Latest Trends and Innovations in the Field of Cosmetic Dentistry in NYC by [Dentalcarenyc](#)

Article published on April 14th 2012 | [Health](#)

It is no more a hidden fact that in New York City, immense attention is paid on one's personal appearance and persona. It is of no surprise that this trend has spread to the dental arena as well. The increasing advancements and innovations in the world of dentistry have given rise of the development of cosmetic dentistry (or aesthetic dentistry). Cosmetic dentistry NYC experts refer it as dental treatments that are crafted to improve and boost a person's smile and correct cracked, stained, unevenly spaced and chipped teeth. From tooth colored filling to dental implants, patients can select from a wide array of cosmetic dental solutions to reinstate the vitality and health of their smile.

Think of cosmetic dental procedures as a way of adorning your smile. With the aid of today's cosmetic dental procedures, a person can conceal crooked teeth, mask the gaps with veneers and add sparkle to the smile. However, do not let the name fool you as cosmetic dental treatments are not merely about looks. Investing in cosmetic dental procedures can fix problems like lost teeth with dental implants, which greatly helps to improve the person's overall oral health.

Trends & Advancements:

A Cosmetic Dentistry NYC professional aims at elevating the aesthetic appearance of individual teeth and offers the desired treatment based on individual's needs. The innovations and advancements in the arena of cosmetic dental procedures range from invisalign braces, inlays/outlays, porcelain veneers, smile makeover, dental implants, teeth whitening to gum lifts. Aesthetic appeal and biocompatibility are typically the cornerstones of aesthetic dentistry. Laser based cosmetic dental procedures have garnered incredible importance and widespread admiration in the genre of aesthetic dentistry. Affordable and innovative cosmetic dental treatments that provide the natural tooth structure without any side effects are on the rise.

Following are some of the Prevalent New Cosmetic Dental Procedures in NYC:

Dental Veneers: Instead of going for the painful teeth extraction and dentures, aesthetic dentistry puts greater emphasis on veneers. Veneers are considered as an affordable and wonderful alternative that helps in correcting uneven, cracked, chipped, damaged and crooked teeth.

Tooth Shaping: This procedure helps in improving the smile by means of removing the enamel and then, reshaping the teeth to enhance their aesthetic appeal.

Invisalign: Invisalign is a brilliant solution for unevenly spaced, gapped or overlapping teeth. Invisalign is the most sought after teeth-straightening solution for adults who wish to avoid orthodontic braces.

Laser Teeth Whitening: While porcelain caps and white fillings have not been effective in rendering desired teeth whitening results, an increasing number of people are switching to the new revolutionary technique called laser teeth whitening.

Gum Lift: This is one of the newest cosmetic procedures, which not only helps in restoring decayed teeth, but also helps in correcting gummy smiles. This technique is popularly called crown

lengthening.

Cosmetic Dentistry NYC surgeon performs dental treatments for those who want to have healthy teeth and scintillating smile. However, it is decisive to find a reputable cosmetic dentist, who can render satisfactory results and a happy-pink smile.
