Article published on February 15th 2012 | Health

Start using electronic cigarettes or e cigarettes in place of traditional cigarettes to remain safe from the hazards of smoking. When you use electronic cigarette, it delivers pure nicotine rather than delivering 4000+ harmful chemicals. These cigarettes tastes and looks like real cigarettes when you smoke with them. But, these cigarettes are far better and safer than real cigarettes. Smoking lead to death and it is very important to quit smoking to remain safe from its hazards. Smoking causes cancer and damages your lungs. So, itâ€™s time to choose the better and healthy alternative of smoking.

An e cigarette is composed of three main parts i.e. battery, atomizer and a cartridge. A battery is lithium made and rechargeable with an inbuilt sensor. Sensor continues its working as soon as a smoker inhales. A coil is given in an atomizer which heats up and vapourises e liquid to produce smoke while smoking. A cartridge contains absorbed wadding of e liquid. A cartridge also works as a mouthpiece to inhale vapours. The smoke produced while smoking with these cigarettes is completely harmless and causes no side effects to second hand smokers. These cigarettes produce the same smoke which is used in movies and plays to produce fog.

Electronic cigarettes are much safer

Electronic cigarettes are available in the market from the past few years and were developed by the Chinese pharmacist Hon Lik in 2003. It has achieved lot of popularity till then. A real cigarette usually contains more than 4000 harmful chemicals which include some most hazardous chemicals i.e. tar, cyanide, arsenic, carbon mono oxide and other carcinogens. When you smoke with electric cigarette, you will receive only pure nicotine hit. A single cartridge can deliver more than 300 puffs which is almost equal to 30 real cigarettes. It costs you so less and you can save hundreds of pounds every month.
