Article published on December 31st 2011 | Health

There are many people who have eyesight problem and there are many who cannot see at all without glasses. How well it would have been if your eyesight could have improved without any surgery? Yes, it is possible with the new pinhole glasses. These are specially designed glasses which are based on the conventional technology of pinhole that improves the vision of a person.

The pinhole glasses are made by plastic and with small pinholes in it. The user needs to look through these small holes and that reduces the amount of light coming from the object that is viewed. There are many people who have myopia which is a result of improper refraction which can even cause farsightedness and diminished focus range of the eyes. The pinhole glasses only allow the center most rays to come into the eyes and block the outermost rays and that is the reason why there is no refraction error. This technology improved the eyesight and is great for people over 40 years. As the pinhole glasses have no power, of lances, it is suitable for all people and a good one will last for a longtime.

As the pinhole glasses are good for the eyes and has a soothing impact on it, subliminal mp3 has its soothing impact on the mind of a person. These forms of massages were present previously but it was banned because of its high impact on human mind. Today these massages are available in positive form and can be bought from specific stores. These massages are targeted to the subconscious mind to influence behavior of a person in a positive way. You need to listen to them regularly and this works like meditation on the mind.
