Most common eye or vision problems include near sightedness, far sightedness, astigmatism and Presbyopia. In most cases, lenses such as concave, convex and bifocal may be used to correct these problems. Contact lenses are often used in with frames as well. However, whether one is using lenses with frames or contact lenses, there are occasions when one may feel irritation in his/her eyes. While playing games, skiing or swimming contact lenses may become really problematic.

Though contact lenses seem a classy solution, where one can get rid of from the pain of wearing a pair of glasses, but these lenses also bring along a lot of issues. Sipping a cup of hot tea or coffee can be an issue if you are wearing a pair of contact lenses as this may cause a layer of cloud in-front of them. But nothing to worry! Blade free Lasik surgery is a solution here. And now Blade free Lasik surgery can also be done in Delhi/India.

Laser eye surgery in Delhi is carried out by blade free Lasik process. Lasik is the acronym of Laser Assisted In-situ Keratomileusis. This is the most common form of laser procedure and is very effective in the treatment of a number of vision problems. Blade free Lasik surgery procedure needs just a few minutes to perform. But, the effect of this non-invasive surgery will change your life totally.

Blade free Lasik surgery that is carried out in Delhi/India is also known as IntraLase process. It is one of the most advanced laser eye surgery procedures available in today's world. In the normal Lasik surgery the flap on the cornea is created with the use of a hand-held blade. The Eximer laser is later used to work on the layer below. However, in the IntraLase process the laser cuts the flap as well. Laser eye surgery in Delhi uses laser of infrared beam to divide material at the molecular level. And one need to worry as there will be no damage to the surrounding tissues due to heat or shock wave.

Visual Aids Centre, where blade free Lasik surgery is carried out in Delhi/India, has the best of equipments and professional staffs. More than 15,000 satisfied and successful patients have gained from the procedure available at this centre. Each client has been given personalized attention and service. The senior optometrist at this centre for laser eye surgery in Delhi has served five successive Presidents of India and was conferred Padmashree on 30 March 2000 in recognition of his services. Clients are offered also free three nights' accommodation at walking distance from the clinic (subject to availability).
