Article published on June 19th 2012 | Health

There seems to be a never-ending war between contact lens and prescription glass. Both of them are equally popular with separate group of people. Whichever you choose, it ought to serve your purpose rightly. However, before opting for any one of these, you must consult and eye specialist because he is the one who is going to check the condition of your eyes and prescribe power for them. Then you can go to optical store to get the power on the Prescription glasses or on the contacts. Both of these have their share of advantages and disadvantages. However, none can outshine the other come what may.

Thus, it is always a personal choice of people to choose one over another. When you wear glasses, it feels like something is blocking your vision, which is not the case with Contact lenses. Most of the people also consider that they do not look good when they wear glasses. However, this is not true. One can look extremely good after wearing glasses if he chooses the right pair. One can even look better with glasses than with naked eyes. Different types of fancy and stylish glasses are available in the market today that one can opt.

Contact lenses are class apart and these are available in different colors as well. You can pick any one of the colors to match with your mood and outfit. However, you need to handle them with care as they get tear very easily. You ought to choose the best brand in the market as contacts tend to cause irritation and swelling in the eyes. Moreover, since they are attached to the eyes they can cause several other types of problems as well such as etching, redness of eyes etc. It is difficult to wear them in rain and wind. Apart from these disadvantages, lenses are quite easy and effective solution to eye problem.
