Article published on March 2nd 2012 | Health

While, the surgical procedure and technique are extremely safe and popular, but as a patient, it is important you know about every aspect of knee replacement surgery in India before you decide to go for it.

Below are five things you know about knee replacement surgery India:

Always go for a hospital or surgeon who has a proven record of accomplishment â€“ One should always choose a hospital and a surgeon who has the maximum experience in handling such cases. Name is very important. Like orthopedic surgeons in Delhi. When it comes to renowned surgeons performing replacement surgeries, orthopedic surgeons in Delhi are most popular and talked about. Therefore, always get a proper background check done.

Try to reason with the doctor on the urgency of surgery â€“ is it really important to get a surgery? Is surgery the only option? These questions you must ask your doctors. Remember, that surgery should be the last resort not the first. No one wants to go under the knife if there are better options. For example if you have been asked by your doctor to undergo revision hip surgery in India, you must check with them whether traveling that far to get the surgery is most necessary. Usually, surgeons and doctors recommend that to get a revision hip surgery India is the best thing to do. Nevertheless, cost is another factor that you must consider.

Cost assessment â€“ we understand that in time of emergency, the last thing that comes to mind is cost and money. We always want that our loved ones get well fast so that the family can live happily again.

At such times, different people will suggest different ways and means through which you can recover from the problem. However, the fact is that one should never believe false notions and impractical ideas. The thrust should always be on logical and scientific ways. Remember, there needs to be some science behind anything anyone suggests. After all, every penny being spent that time is important.

Also, ensure that you do a proper cost assessment, in case you have to go out of country or your city for treatment. Besides the cost of surgery and medication, also include the cost of traveling, accommodation and follow-up checks and based on the final numbers decide the place you would want the surgery to be performed in.
