What All on 4 Implants in Houston can do for Denture Wearers!

by Derrick Jones

Article published on May 7th 2012 | Health

In the early 1990s, a technique for fixed oral rehabilitation was innovated by European implantologist Dr. Paulo Malo in collaboration with one of the worldâ€™s leading dental implant manufacturers, Nobel Biocare. Since its conception, the revolutionary technique referred to as â€˜All on 4 implantsâ€™ in Houston has succeeded in drastically improving the lives of tens of thousands of patients all over the world and has given hope for a better future of oral health to the millions more who suffer from tooth loss as a result of advanced periodontal (gum) disease. In this article, we will be taking a look at what All on 4 implants in Houston can do for those that are either already edentulous (donâ€™t have a single original adult tooth left) or are facing an immediate future of edentulism. We shall then take a look at the benefits of this dental implant protocol over and above the traditional and somewhat archaic approach to treating edentulism: removable dentures or â€˜false teethâ€™.

What All on 4 Implants in Houston can do for You

Quite simply, All on 4 implants in Houston provide a comprehensive, non-removable and long-term solution for patients suffering from tooth loss and edentulism, generally as a result of advanced periodontal (gum) disease. Even patients who have been told that they are not candidates for traditional dental implant techniques are able to get a full set of teeth that function, feel and look like natural healthy teeth. In some cases, All on 4 implants in Houston can be placed in as little as a single dental appointment of only a few hours! The protocol itself is far less expensive than traditional dental implant techniques and it gives patients beautiful, immediately functional teeth that can last a lifetime.

All on 4 Implants in Houston and â€˜false teethâ€™: The Difference

The solutions provided by All on 4 implants in Houston far exceed any of those ever supplied by traditional teeth replacement techniques, such as removable full or partial dentures (false teeth). Essentially, you will receive a fully customized prosthetic dental bridge which is permanently attached to dental implants in your mouth. As a result of this, the custom-designed prosthesis:

â€¢ Does not apply pressure to or rub against the underlying gums, causing inflammation, discomfort and the development of sores.

â€¢ Does not require removal at nighttime or after meals for cleaning; in fact, All on 4 implants in Houston are cared for just like natural teeth, sparing you the inconvenience and social discomfort associated with removable dentures.

â€¢ Cannot fall out causing acute social embarrassment.

â€¢ All on 4 implants in Houston provide aesthetic solutions that are virtually indistinguishable from natural healthy teeth.

â€¢ Do not cause bad breath, impede your sense of taste or trigger the gag reflex.

â€¢ Promotes good jaw bone health: When teeth fall out, the important stimulation the tooth roots provided the bone in the jaw with is also lost. As a result, this hard tissue atrophies. It is the loss of a significant amount of bone volume that gives edentulous people an aged and sunken appearance about the mouth (see image below). All on 4 implants in Houston function like tooth roots and so

provide the jaw with the stimulation it needs to remain healthy; effectively preventing further bone loss.

All of the above-mentioned short-comings are associated with removable dentures and All on 4 implants in Houston successfully overcome all of them! Donâ€™t waste time, money and your quality of life on inferior teeth replacement technology. Qualified and experienced implant dentist, Dr. Wayne Brueggen, recommends breakthrough All on 4 implants in Houston over all other technology and protocol, time and again.
