What Better That Brazilian Waxing for Women with Fortitude by Cameron White

Article published on February 7th 2012 | Health

What can keep you away from a beach on a sunny clear day? If heading to the beach and flaunting just your new swimsuit is not enough. Caring for the body as much as for the swimsuit is important especially for the ones conscious about body hair and having an ideal beach body is a must. There are loads of spa salons offering Brazilian Waxing. San Diego is one of the hot favorite beach destinations in the US where life revolves around the pristine beaches and clear skies perfect for enthusiasts. Waxing is the most affordable and easiest way of removing unwanted body hair. Brazilian Waxing for Women and men differ in terms of the technique, length of the sessions and areas to be waxed. It is undoubtedly the most ideal way of getting rid of unwanted hair.

Ideally a Brazilian wax removes all of the hair from the pubic region. The procedure in any parts of the body is a bit painful and if done on the sensitive pubic region, Brazilian Waxing in San Diego salons will advise to be a bit brave to bare the pain. If not pain some discomfort is expected.

What to expect of Brazilian Waxing

Basically, the technique is extremely simple. It involves some warm wax and special stripes. The area from which hair is to be removed is thoroughly cleaned and dried. Then warm wax is applied on the area. It usually is organic and is free from adulteration or contamination. The warm wax is great as it helps in quick removal of the hair form the roots with minimal pain or discomfort.

The Procedure

The procedure starts by applying a thin sheet of wax on the area. It has to be warm enough to be applied evenly. Then, thin strips are pressed against the skin so the wax and the strips hold on to each other firmly. With one brisk stroke the stripe is pulled removing all the hair to which the warm substance was applied. A slight stinging sensation or pain is extremely normal. The same procedure is followed until all the hair has been removed. Since the hair is removed right for the roots its takes at least two to three weeks for them to grow back. After the procedure, the area is carefully cleansed with cold water to remove any residue or hair. In case of a hair or two left un-removed they may be tweezed out. A soothing lotion is applied to relive the discomfort if any.

After care

There is almost nothing to do after the session. But in some cases a slight rash may occur immediately after the procedure. The rash may be severe in cases of sensitive skin. Applying a cold press is extremely beneficial in such cased. Finish with applying a soothing Aloe-Vera lotion to ease the discomfort of any itchiness. Make sure to apply a good sun block to avoid any sun damage. Brazilian Waxing for Women is the best way to remove pubic hair and is more hygienic and reliable than any other method.
