Rc Trucks are a Hobby for Everybody by Javed Khan

Article published on December 29th 2011 | Hobby

Exciting thing about driving trucks is they are not only meant for driving by kids and children but also adults. The hobby of radio controlled trucks comes with a range of forms and levels of complexity that excite everyone. The hobby of rc vehicles initially started out for kids with basic and simple rc toys. Advancement in technology has brought about several radio control trucks that attract enthusiasts and owners of all age groups from early teens to 30â€™s and more. The involvement of mature hobbyists into game has changed its perspective into a sporting entity played at all levels. There are several racing tracks and circuits build for completive racing with rc vehicles. The level of the competitive sports with rc vehicles goes high as national level. The competitive sports are held in different classes of such as amateur and professional.

The hobby of rc trucks is not only limited to those with more money but also with limited finance can enjoy as well. The range of options for the hobby is extensive. It depends on the hobbyist wish, how deep and how much he/she wants to spend on the hobby. An Rc vehicle in the same way of their popularity with people of different age groups is the same way with people of different financial strengths. There are hobbyists who get involved in rc trucks racing as their life long hobby that they end up spending money on it to the last penny. The money is spend on buying advanced parts, upgrading of suspension systems or buying a new high powered nitro truck.

One thing that all people engaged in the hobby agree about rc trucks is the level of excitement and thrill they experience. When one holds the remote control of the truck and make it follow commands, maneuver the truck across obstacles and turns and racing on tough terrains. This is an amazing experience with brilliance performance. Rc trucks have various levels of speed, performance and power. These can be chosen depending on a personâ€™s requirements. Power versions of rc trucks include nitro, gasoline and electric trucks. Early days saw gasoline trucks moving at high speeds than electric trucks. The trend has changed today with advance in technology. The electric trucks today have engines that come at par with gasoline engines in terms of power and speed. Some hobbyists like the quite sound characteristic of electric engine while others like the roar sound and exhaust produced by gasoline trucks.

People with dreams and desires of driving actual vehicle brands and models can be satisfied with driving an rc vehicle. There are some rc vehicle models making companies manufacturing model versions of actual vehicles. The limitation of using electric trucks is limited battery life. Battery is needed to provide power for remote control. Rc trucks require fresh set of batteries after only moving small distance for smaller periods. Simple batteries provide limited lie and poor speed performance. Improvement in the quality of batteries has led to increased life, power and reliability. New battery technologies are being developed for purposes of improved performance in electric trucks.
