Plastic Toilet seat covers are now used almost everywhere because of their easy availability and affordable price. Using toilet seat covers are an absolute must in public restrooms. That is because since so many people use it, it is very easy for the germs to find their victims. Also, open toilets attracts flies and insects which is unhygienic to day the least. They also let off odors and bad small, making the entire environment difficult for breathing.

Plastic toilet seat covers are hence becoming very popular because they are dirt cheap and can be easily replaced. Almost all public restrooms have them. They are also very good when it comes to portability. So if one is traveling, one can carry such covers for the time being that they are using public restrooms and dispose them off. Another reason why plastic toilet seat covers are popular is because they are so light. Compared to other materials, it is easier to clean them and then there is no problem of drying them. Government and municipality employees can hence do their work efficiently.

It is also important to notice that plastic toilet seat covers have an added advantage of being non breakable, compared to ceramic. So they can be washed really fast. And replacing them is not difficult either. The only drawback is that certain sections of the neither community and environmentalists say that they are nor eco friendly, so when they are disposed off, the might cause pollution. But eco friendly covers too are now available in the market.

Other than that, plastic toilet seat covers are the most efficient way to ensure that hygiene is maintained at all times of the day in the pubic restrooms and toilets.
