Article published on April 13th 2012 | [Home Improvement](#)

Track Lighting is simply a versatile piece of lighting fixture which can be utilized in a variety of ways. It is a very useful piece to have for your home décor needs. Illuminate your drawing room corners and bring into focus a gorgeous painting using the track lights. You can decorate your home with multiple themes using the track lights. Bring out a range of effects starting from the quite minimal to the highly dramatic. The handling of these lights is also very easy, so that anybody can do it without any problems. These flexible track lights have a hassle free installation. If you wish to be innovative in your home interior decorations, all you need to do is to make the right use of track lights. This way you are sure to achieve a look to be proud of.

Features and the purpose of track lighting

Track lights as the name suggests consist of a track and a track head. It is in the track head that the light bulb is placed and the wiring remains inside the track. The conventional track lights come in white or silver color and are industrial in appearance. The use of track light is in targeted lighting and also has some general lighting purposes. However you cannot use a track light as a book light or in table lamps. Also track lights can be placed in one single file on various walls. You can choose from a wide array which is available in the market since the Track Lighting come in a variety of styles and finishes.

Using the track lights

You may connect the track lights to the existing power connections in your home and then related to the switches for illumination.

Styles and sizes

Whether you are looking to decorate your home in traditional, modern or transitional decors, you are sure to find a Track Lighting system that satisfies your requirements. There are bronze, silver and even faux wood light systems to match the theme in your room. The heads containing the light bulbs can also have a variety of styles including sconce, frosted or art glass, pendant and brushed steel. You can choose from small track with two heads to longer ones with as many as eight heads. There is a wide variation in the shapes of the Track Lighting too. There is S-shape, two-tier lighting as well as spiral shape track lights.
