Are you looking for new Loft Ladders for your home?

by Mary Porter

Article published on June 20th 2012 | Home Improvement

Over the past few years the state of the property market has meant that many people have chosen to stay put in their current home rather than move, and this means that more homeowners now need to make the most out of the space they have. Using loft spaces or basements is a great way of utilising the space in a property and to ensure that a loft can be safely accessed, loft ladders are absolutely essential.

If you are looking for loft ladders then it makes sense to go for top quality loft ladders which have been made from durable materials and can also stand up to constant use. The right loft ladders will be easy to install and able to be fitted to any kind of home or property.

Here at Ramsay Ladders we specialise in loft ladders and our selection includes both timber and metal options, depending on the needs of our customers as well as their loft ladders budgets. Over the years we have built up a solid reputation for providing durable and quality loft ladders and our loft ladders vary from three part folding timber loft ladders to spring controlled ladders with three separate brackets.

Many customers coming to us for loft ladders choose our original Ramsay loft ladder options, which are available in five different sizes up to a maximum height of 3.66 metres. These loft ladders feature spring controlled operation with three brackets and have treads which are 385mm wide and 90mm deep. Those buying these loft ladders can also benefit from an included handrail, an operating pole and all the relevant fixings.

All that our loft ladders buyers need to do is supply the trapdoor and then they are good to go with their new loft ladders.

If you are looking for top quality and durable loft ladders then visit us here at Ramsay Ladders and find out about the wide range of loft ladders we have on offer. All of our loft ladders are made from quality timber or metal and can be customised to fit in with the specific needs of any customer.
