Be Sensible with Mastic and Alcoa Siding by Rolf Matchen

Article published on July 18th 2012 | Home Improvement

If you live in Virginia, you'll see that the weather condition, for the most part, is mild. However, the location still has its share of blizzards, typhoons, and even the periodic twister. One particular way to prepare yourself for these disasters is to set up Mastic or Alcoa vinyl siding on your residence.

These brands have been producing innovations in vinyl siding since 1959. Mastic and Alcoa merged in 1989 so that both companies now have a larger reach in the exterior siding industry. In 2009, all their products came under the "Mastic" brand. Regular Mastic vinyl exterior siding is characterized by its similarity to wood. About a fourth of US houses use Mastic vinyl exterior siding, for a variety of reasons, a few of which are listed below:

Charm

Need to provide a natural look to your residence without spending a lot of dollars on real wood? Get something like Mastic vinyl home siding, which will make your residence look like it's covered in genuine cedar shingles, among other kinds of wood. Like the majority of vinyl sidings, these can be found in a large variety of colours, so you have lots of options.

Ease of Installation

If you're a DIY person, this siding is perfect for you. Mastic vinyl sidings have a nailing flange along the top and interlocking flanges at the bottom, so it's pretty simple to determine which part goes where. You only require a nail hole punch, snap-lock punch, and an unlocking tool to help you. When setting up these home sidings, you only need to keep in mind that vinyl often tends to expand or contract, depending on surrounding temperatures.

Great Security

Mastic siding Arlington Virginia residences use can resist winds of up to 160 miles per hour, which makes it best for withstanding those Virginia storms. Furthermore, you can breathe easy knowing that this home siding reduces external sounds by 50 percent. It can also keep you warm throughout the winter season months, because this siding can decrease the heat energy that leaves your residence by 25 percent. All of these characteristics can be attributed to the combination of an unique compound and foam.

Financial Benefits

At first glance, Mastic siding Fairfax Virginia homeowners count on might seem pricey. However, considering its sturdiness and all the benefits mentioned above, you'll feel that every cent you invested is truly worth it. Moreover, you'll discover a boost in your house's resale value due to the improvement in your residence's total quality because of these house sidings.

If you're looking for a good product for siding Northern Virginia homes, look no more than Mastic or Alcoa. Select this siding, and you may see the distinction in your residence's look, security, and resale value.
