Benefits to Adding Water Features to Landscape Design by Ken Zmijewski

Article published on May 26th 2012 | Home Improvement

Over the last couple of years, more and more people have been including water features in their landscape design not just because of the value that it adds to their home, but due to its role in conserving the environment and offering a serene atmosphere for relaxation. While it may cost you and additional $5,000 to install water features such as ponds and waterfalls, you will greatly benefit when it adds an extra $15,000.00 to the general value of your property.

Therefore, if you are searching for information on the benefits of water features to landscape design, you will find this article quite an interesting read. Discussed herein, are some of the advantages of water structures to a landscape design:

Increased property value

While purchasing your home, one of the things that you hope for is that you will be able to sell it at a profit so that you can invest on another property. While most people focus more on interior design when it comes to enhancing the value of a property, unknown to then is that by improving on the general appearance of your outdoors, you can improve the value of your property. Water features such as ponds and waterfalls offer a perfect place where you can host barbecues or family gatherings. Hence, if you can provide this to prospective home buyers they will be more than willing to pay extra.

Environment conservation

Including water topographies in your landscaping is a way through which you can help in environment conservation. If you are planning on building a water fall in your backyard, chances are that you will also be planting trees. Hence, if you want to play a role in environment conservation, you need to consider building a water pond or waterfall in your backyard.

Magnificent visual effect

Perhaps one of the reasons why a majority of homeowners build water features is because of the magnificent visual effects that they provide. Building a fountain in the middle of your front yard surrounded by beautiful roses as well as well manicured lawns offers a beautiful sight for everyone passing by or visiting your home.

Healing effects

Surprisingly, there are numerous studies which suggest that adding water features in your property can provide you with therapeutic benefits. The sounds of waterfall in your backyard can aid in relieving the pent up stress and anxiety that build up during the day. Therefore, if you are looking for a natural way of easing stress, you need to consider building water structures in your backyard.

Nonetheless, it is important to point out that your choice in landscaping contractor will determine the kind of water structure you will end up with. Consequently, it is important to ask for references while shopping for a reputable landscape contractor to build the water feature.
