Buying Carpet for the Home: What are the Benefits? by Janine Green

Article published on January 25th 2012 | Home Improvement

Compared to some other types of flooring, carpet offers several benefits for the homeowner. Itâ€™s relatively inexpensive, soft, warm and durable enough to last for years. But carpeting holds many more benefits that you may not be aware of. Letâ€™s look at a few of the many reasons why todayâ€™s carpet is a worthwhile investment.

Carpet Helps You Cut Down on Heating Bills

You may not know it, but carpet actually has whatâ€™s called an â€œR-Valueâ€• which means that it help retain heat which can in turn cut back on your heating bills if you live in a colder area. With its comfortable softness and padding, it also provides a refreshing look that helps pull together a room no matter how you choose to decorate it. Few types of flooring let you express your creativity and save you money like carpet can.

Carpet Prevents Slips and Falls

You may not think much about the floor you walk on, but if youâ€™ve ever experienced a slip or a fall on a hard floor, you know how welcoming the softness of carpet can be! This feature is particularly important for families of young children (especially those just learning how to walk!) and older individuals, where a fall could mean a broken bone. Carpet helps provide added protection in times like these where other types of flooring could leave unsteady walkers prone to slips.

Carpet Keeps Noise at Bay

Carpeting with a cushioned padded backing can reduce several types of noise. It absorbs sound coming from televisions, stereos and video games â€“ so you can work, read or sleep in peace and quiet. But what you may not realize is that carpet acts as a perfect sound buffer between floors too. If youâ€™ve ever been awakened by creaky floorboards in the middle of the night, you know how invaluable having carpet with cushioning padding can be to reduce noise in your home.

Carpet is Easy to Care For

Carpet is great for people with asthma and allergies, because its fibers can trap allergic reaction-causing particles like pet dander, pollen and dust â€“ making them easier to vacuum up later. With regular vacuuming, your carpet can continue to look like new for years. Itâ€™s also a good idea to have it professionally cleaned periodically â€“ especially if there are stains or spots that you canâ€™t get out on your own. Plus, the deep cleaning will help refresh and enliven your carpet.

If youâ€™re worried about overall wear and tear making your carpet lose its luster, ask your carpet and flooring specialist about additional warranties or guarantees which can protect your floors even beyond the manufacturerâ€™s original warranty. With these tips in mind, youâ€™ll be able to save money create a beautiful look for your home, and keep your floors looking their best year after year. With so many reasons to own carpet, perhaps the hardest part will be deciding on the perfect color or pattern for the room youâ€™re redecorating!
