Ceilite - the Environmental Insulation Solution by Kalley Jacks

Article published on March 7th 2012 | Home Improvement

You can also make your R Value more efficient as this insulation panel is self supporting, you can simply place their panel directly over your exiting tiles which will reflect 97% of radiant heat.

Manufactured and designed in Australia to Australian specifications, Ceilite has superior benefits over existing insulation and ceiling panels. We provide an environmentally friendly superior insulation panel. Builders, Developers and Architects not only prefer and promote Ceilite, but they also encourage using it because of its long-lasting durability, easy installation, eco-friendliness and affordable properties.

It is just the main reason why Ceilite insulation has been the hot favorite among builders, contractors, clients and tradesman. Ceilite insulation is the plasterboard alternative useful for floor, walls and ceiling insulation. The main aspect of Ceilite insulation is that it covers maximum area with lesser amount of man power.

Law of average is perfectly applicable to ceilite insulation, as it achieves maximum in minimum. It is manufactured, promoted and sold in Australia keeping the weather and climatic conditions in mind.

We provide wall insulations with properties like Excellent thermal & Acoustic ratings, Fire retardant properties, Made from recycled products, Lightweight and strong, Smudge resistant polyethylene finish, Water Resistant, Occupational health and safety friendly, Energy rated Meets Australian standards, Locally manufactured Suitable for suspended ceilings, Worldwide patent, Minimizes warranty claims, Suitable for marine applications.

We provide Therma - Ceil which has 20 mm E.P.S. foil backed heat reflective tile with a pre-finished vinyl face. Making it ideal for hot areas where there is a small void between the ceiling and roof area, giving you a total â€œRâ€• value of 2.6. They are the commercial Ceilings, namely the internal suspended ceilings which are used for all commercial applications where heat is an issue.

Their features include Lightweight, multiple sizes, Australian made, thermal and acoustics values, environmentally friendly, cost effective, available in a range of finishes,(including timber grain), fire retardant. We offer Sound Ceil ceilings with Pre-finished acoustics ceiling panel used where sound reverberation needs to be reduced. They are the internal Suspended Ceiling Tiles which is suitable for all commercial applications where noise is an issue.

Ceilite offer a fantastic opportunity and the freedom to explore your imagination for an added dimension in design potential. The versatile profile system allows the ceiling to be installed as a simplistic flat ceiling or in varying forms such as pitched, curved, vaulted, domed, 3-D, and circular. This distinctive system offers a palette of colors, choice of texture, and has the ability to create clean-and-cool or loud-and-colorful ceiling features and lighting effects.

The Material is maintenance free, hygienic, non toxic, and is Class A (I) Fire Rated. Ceilite insulation is also diversified into manufacturing of wall linings, under slab insulation, under floor insulation and Drop Ceiling Panels with the substance made up of thermal and light weight properties with hard long lasting durability, waterproof and environment friendliness. Our Insulated Ceiling Tiles are world famous.
