Cooker hoods: Creating a Pleasant and Entertaining Social Environment by Martin Crowe

Article published on December 16th 2011 | Home Improvement

Types of cooker hoods:

There are many cooker hoods to choose from, that cater for different needs and budgets. Combining the kitchen, living and dining rooms is growing in popularity. This offers a pleasant and entertaining social environment for a modern family. Removing the barriers allows free communication besides permitting cooking odor and steam to spread in the entire home. Elica offers useful information that can be relied upon in choosing a model that suits your needs. Cooker hoods are therefore becoming an essential appliance geared towards achieving this end. Elica Cooker Hoods have the capacity of complementing an existing style. They have proven to be functional and efficient. In addition, they offer contemporary style and taste.

Baumatic Cooker Hoods focus on style and seek to complement Baumaticâ€™s range of cookers. The cooker hoods feature materials and colors that are eye catching. In addition, the company is keen to adapt innovative technology to produce appliances that are reliable, durable and easy to use. Baumatic Cooker Hoods come in several configurations including standard hoods, telescoping hoods, integrated hoods, island hoods, chimney hoods and canopy hoods.

The Island Cooker Hoods come in different sizes with the smallest featuring a dimension of 90cm. Most of the Island Cooker Hoods offer a multi- speed motor. In addition, they have a capacity of extracting or re- circulating the air. Meanwhile, the most expensive brands feature touch controls and remote control. Some models feature an indicator that signals the present setting and give an alert when the filters require cleaning. Moreover, the cooker hoods come equipped with a light source.

Chimney Cooker Hoods come in large sizes (more than 90cm) and offer kitchens a professional touch. They provide the ideal ventilation for ensuring clean air. Stainless steel is a common material used in the construction of the canopy. Glass is also used although it offers a more expensive style. In addition, the control panels are featured on the canopyâ€™s lip. The modern hoods come with an electronic control panel and provide an alert system. Moreover the less expensive style are fitted with incandescent or halogen bulbs while the most impressive models are fitted with internal lights and a neon or LED backlighting in the chimney.

The Cooker Hoods UK market advises on several features to consider while choosing a kitchen hoods, including:

â€¢ Type of filter: Disposal fleece filters offer a convenient choice. On the other hand, a metal filter can be soaked readily and loaded into a dishwasher.

â€¢ Type of material: A canopy constructed using stainless steel offers more durability. Nevertheless, it is more difficult to clean compared with the glass option that is often more expensive.

â€¢ Placement of controls: Some models feature-recessed controls for adding their aesthetic value. UK models feature the controls upfront to enhance easy access.

â€¢ Lighting: Incandescent and halogen bulbs are common. Some models use LED lighting. Others focus on appearance and therefore feature internal lights and neon lighting that create an impressive ambience.
