Article published on February 23rd 2012 | Home Improvement

A theme look is indeed suitable for the bathroom too. If you want to experiment with something abstract and adventurous for your bathroom, you can go for abstract textured laminate for the doors, partitions, and countertops. It is a different type of decorative laminate in which abstract designs and themes are duplicated on the textured laminate giving it a different and unique touch.

For example, if you wish to make your bathroom extremely comfortable, go for the fabric variety of abstract textured laminates. The natural colours and textures will feel very close to real fabrics bestowing the bathroom the real fabric like look and feel. Similarly, you can go for a bamboo look or the paisley couture look or choose from the many other varieties of decorative laminates available in the market to give your space the desired theme look.

Another important aspect of bathroom decor is space. Ensure that there is enough space in the bathroom for people to walk around. Especially when it is a restaurant bathroom, there is a possibility of having more than two people inside at the same time. Therefore, you need to use flexible furniture that will give you the required space. Rather than going for separate toilet counters, use laminate partitions between toilet seats. Donâ€™t go for bulky sinks and countertops, go for compact laminates rather as they can be customized according to the space available in the bathroom, making it easier for the people inside to move around.

Do not forget the bottle of freshener for your bathroom. Without some fresh aroma in the bathroom, decor can never be complete.

Thanks to wood laminate, there is something for every decor need. With the arrival of wood laminates in the market, the entire interior decor industry has completely changed. The seamlessness, the variety, the design options that wood laminates provide, is just amazing. Above all, the functional properties of wood laminates make them extremely desirable for multipurpose usage. Whether, you want to use laminates for your home, or for your commercial space, there is something there for every requirement.

You can try out the above-mentioned products for your restaurant bathroom and let us know your feedback. For more information regarding decor, write back to us here. Until then enjoy laminating your space!
