Dry out your home, Damp Proofing holds the key by Mary Porter

Article published on June 20th 2012 | Home Improvement

Spot the early signs of damp and have Damp proofing treatment on your property before it becomes a major problem and youâ€™ll save time, money and expenditure in the long run. For effective Damp Proofing thereâ€™s no point in cutting corners itâ€™s wise to bring in experts as soon as you realise there a problem, this way a remedy can be found as soon as possible.

Building companies that provide top class roof repairs are happy to carry out Damp Proofing in properties and itâ€™s worth giving them a call in the first instance. Get them to advise you about the extent of Damp Proofing your property will require but make sure you enlist the help of professionals that use proven methods of treatment.

Look for telltale signs thatâ€™ll show you if you need Damp Proofing or not and itâ€™ll help your home to become nice and dry.

What to look for

There are certain ways to check to see if your home needs Damp proofing or not. If your house hasnâ€™t had a Damp Proofing course in the past it could easily be at risk from moisture penetration.

Without Damp Proofing moisture travels quickly around the property look for wet patches on walls, rotting skirting boards and paper peeling from walls from no apparent reason. Theyâ€™re all indicators that Damp Proofing could be required and if your house has a couple or all of theses symptoms it might be time to contact a building company that carries out top quality damp proofing and first rate roof repairs.

How can they help?

The first thing contractors will do when they visit your property to carry out Damp Proofing is establish just how bad the problem is. They can test walls for damp and once they know the true extent of the issue theyâ€™ll advise you about the methods theyâ€™ll use for Damp Proofing and more importantly, just how much itâ€™s going to cost. One of the most popular methods for Damp Proofing a home involves drilling holes into the bottom of walls and then injecting them with damp proofing membrane. Once the walls have been injected they are plastered afterwards and the problem is resolved.

If you think your home might need Damp Proofing call a trusted team of contractors that complete value for money roof repairs along with a host of other building services.
