FAQs in Constructing or Replacing Home Roofing by Max Boughner

Article published on May 3rd 2012 | Home Improvement

Because of the high cost of roofing construction or remodeling, it is normal for a homeowner to ask the roofing contractor several questions regarding the project. Answers to these questions will define the basic necessities of the project and will help the homeowner further weigh his options. Some answers may reveal truths about the project that can directly affect the type of construction, the project duration, and costs.

How much will roof remodeling cost?

Roof remodeling is slightly different from roof replacement judging from the work involved but costs are most likely the same. Based on square footage, roof pitch, accessibility of the area to be remodeled, and the type of roofing material, roof runs may cost between $2,000 and $12,000. The quality of workmanship and additional features, such as roof vent, may increase costs.

Who is the right contractor?

When asked to a contractor, the question will sound more like â€œAre you reliable?â€• It is important to know the credentials of the contractor, from proofs of professional experiences as a roofer and as a contractor to testimonies of previous clients. That way, the homeowner can ensure a high-quality workmanship that in the end will determine whether or not the roofing will last long.

Is there a way to repair the roof instead?

Most homeowners will choose an option in which they can save more. Repair is definitely cheaper since the tasks and material expenses involved are a lot lower than those of remodeling and replacing. However, deciding between repair and replacement is very crucial when it comes to longevity of output and the risks of further expenses.

Is dismantling necessary in the project?

Dismantling the existing roofing before installing the new material may not be necessary depending on the type of roofing to be installed. In cities like Lafayette where climate speaks of more precipitation until the end of March, homeowners prefer retaining the existing roofing to serve as additional support to the new roofing. However, experts in roofing Lafayette offers properly consider the resultant loading if the existing roof will not be removed. Overloading may result in truss or deck beam failure.

How long will the project last?

While moving to another location during the roof remodeling is only temporary, it surely is a hassle for the family. Homeowners need to know how long they will stay in a temporary sanctuary to have a picture of lodging expenses. Most of them prefer metal Lafayette roofing for easy installation.
