Get Asphalt Shingle Roofing for a More Protected House by Adam

Article published on March 6th 2012 | Home Improvement

Roofing damage can cause major headaches to homeowners everywhere. Since roofs are constantly subjected to different climate conditions, they weaken at a faster rate. The roof guards your home from various risks like water damage from torrential rains, lashing winds, violent hailstorms, and the scorching heat of the sun. Without a roof, a home will be cut down to a pile of wreckage, leaving its occupants at the mercy of the weather.

Compared to other components of the house, roofs withstand more damage. The average roof lasts between 10 and 15 years, but its lifespan can be reduced to a fraction if it is not maintained. Poor care is one of the top reasons for roofing damage. As stated by the National Roofing Contractors Association, roofs should be inspected at least twice annually to recognize signs of damage. If you've been neglecting the state of your roof for a certain period now, it's probably the best time to give it the maintenance it needs.

Reinforcing your roof's protection can be achieved in numerous methods. The best you can do is to make sure the shingles mounted are of exceptional quality. Shingles are overlying flat or curved tiles that channel water and direct it away from a pitched roof. These are manufactured from diverse materials and differ in cost, durability, weight, color, and appearance. If you are looking for a reliable material that is aesthetically pleasing, then you may want to try using asphalt shingles.

Asphalt shingles are created with one of those organic materials and/or fiberglass. The former is typically derived from asphalt-coated paper, while the latter is made of a strong plastic reinforced with glass fibers. Asphalt shingles are common materials for roofing Fairfax homes are known for. Actually, numbers reveal that 80 percent of homes in the United States are protected by asphalt shingles.

Asphalt shingles come with their own set of advantages, such as easy installation. Unlike other shingles of roofing Northern Virginia homes have, asphalt does not require specialized equipment for installation. Moreover, asphalt stays solid and beautiful for extended amounts of time, thus decreasing the requirement for care and repair. Lastly, because it is manufactured in bulk, asphalt is thought of as the most inexpensive roofing material in contrast to other materials.

Roof maintenance is a necessity and it is a strategy to keep your home standing tall despite severe weather conditions. Start increasing your home's defenses, come hell or high water, with the help of expert roofing in Arlington.
