Garden is one of the important parts of everyoneâ€™s home and everyone wants to make it look beautiful. Gone are the days when people overlook its importance and donâ€™t feel it important to decorate it. Now to adorn garden is as important as indoor decoration. Because of the increasing craze of decorating garden in stylish manner among all, many types beautiful and stylish looking furniture are available in market which helps you in adorning your garden.

Sometimes ago, only plastic chairs were used as a furniture in garden but now there are numerous types of furnitureâ€™s are available in market that makes your garden look unique and attractive. Generally wooden furniture is considered best for outdoor purpose. And among wood, teak is most preferred type. Teak is well known for giving rich, elegant and luxurious look. However it is a little bit expensive but very durable and strong. It gives very long life and can bear several weather conditions and it is main reason why it is used as outdoor furniture. If you add cushions on it then it adds more beauty to your patio.

Other then wood, other materials are also used to manufacture garden furniture like rattan, metal, plastic. Some people take rattan and bamboo with same meaning but it is not true. Rattan is solid and not hollow like bamboo and it is durable also. Any design can be easily carved in rattan because of its softness.

Another type of material used to manufacture patio furniture is metal. It offers low maintenance, cheap cost and also long life. All the types of furniture that are generally kept in garden are round table, chair, coffee table, benches, and swings. All these furnitureâ€™s are available in metal. Metal manufactured furnitureâ€™s are the strongest of all. Some people donâ€™t prefer it because of its rusting but there is a solution to this problem. If you coat it with non-corrosive paint then you can save it from rust. Much creatively designed furniture is available in metal furnitureâ€™s.
