Article published on August 16th 2012 | Home Improvement

While selecting bedding, we usually prefer something that is attractive and comfortable. It should not only blend with other furnishing and interior styling of the bedroom, but it should also speak aloud about the character of the occupants of the room. If you have family with children, you may prefer bedding compatible with the lively environment of the house such as Hello Kitty bedding.

Charm of Hello Kitty

If you are an ardent follower of Hello Kitty consumer products, you cannot resist the temptation of bringing home Hello Kitty bedding. The cute cat with a red bow is adored by children as well as adult women. Hello Kitty has left its mark on almost all types of consumer products, clothing and accessories. It is therefore obvious, that bedding with Hello Kitty prints will complement the Hello Kitty products in your house.

Appreciating the popularity of Hello Kitty among children and grownups, the iconic London-based Liberty brand has incorporated Hello Kitty in its collections. The Hello Kitty collections currently available include quilt cover, pillowcases and cushions. Made out of cotton and polyester, these attractive products will easily enhance the appearance of a bedroom.

Hello Kitty designs

There are numerous Hello Kitty designs. The original floral design depicting the famous feline is still popular among kids and adult women. The girly prints add color and vibrancy to a room. Young children will love the fabric depicting Hello Kitty with her family exploring the English countryside. Music lovers, regardless of age, may opt for prints showing Hello Kitty playing musical instruments. Prints showing Hello Kitty in wonderland can be used in bedrooms of both little girls and boys. Epicureans will admire Hello Kitty designs with apples.

Hello Kitty bedding for childrenâ€™s bedroom

You can easily accommodate Hello kitty bedding in a childâ€™s bedroom regardless of the theme of the room. If your childâ€™s fascination for Hello Kitty has inspired you to choose the popular cat as the central theme of the bedroom, you can easily decorate the room with curtains, cushions and a variety of furnishing bearing Hello Kitty prints of different sizes and colors. To avoid overstaffing the room with a single cartoon character, you can confine the cat only to the bedding. While Hello Kitty is the favorite cartoon character of preadolescent girls, even young boys love quilt cover and cushions with Hello Kitty prints when they are used to complement the upholstery and furnishing of jungle or cartoon themed bedrooms.
