Home improvement Fairfax, VA : What You Want in a Window Installation Service by [Roycemighty](#)

Article published on December 6th 2011 | [Home Improvement](#)

When you need a window replaced or installed for a home improvement Fairfax, VA project, you should take the time to make sure that the roofing contractor Fairfax, VA you're calling meets a few qualifications. Now, some people may offer this or that service or product that the competition might not, but at the end of the day, the absolute must-haves, the products and services that you cannot do without from your windows installation service, are as follows:

ENERGY STAR Money Saving Windows

Why are these windows so important? Well, they're affordable, for one, yet durable. A lot of brands are only one or the other. More importantly, ENERGY STAR is affordable in the long run. They provide top notch insulation and help you to keep your home cool when you want it cool, warm when you want it warm and prevent you from having to waste a ton of money on heating and cooling your home during the winter and summer months.

New Installations

You need a windows installation contractor for your home improvement Fairfax, VA project who can put windows in a new area. If you already have a spot where you're just replacing an old window, you might wonder why this matters. Any contractor can swap out one piece of glass with another, but if you decide that you want to change the size of the window, if you find that they don't make the window you want in the size you want or you otherwise need some modifications made in order to properly fit the new window, you're going to want a contractor who knows how to install a brand new window into the wall or otherwise adjust the area to make the installation.

All Types, Shapes and Sizes of Window

Whether you want double hung, picture, sliding windows, garden, bay or casement windows, whether you want a full sliding glass door installed in the back of your home or you just want a charming little porthole in the attic, you want to find a contractor who can offer you any type of window you could possibly want in any size.

Professionalism

Professionalism is really the name of the game no matter what kind of contractor you're looking to hire. Whether you want someone to install a window or door or you're hiring a landscaper, you need a contractor who can offer courteous, friendly service at a reasonable price and who can be honest with you about the exact costs of the service and installation materials and exactly where all that money is going. Experience, fairness, courtesy and honesty are the four key factors that make for a professional contractor service like Kirby Kerns Inc.

There are a lot of contractors in Fairfax, but not all of them provide the same level of quality when it comes to their services and their products. When having windows installed, you really want to make sure that you're hiring one of the best contractors out there. Kirby Kerns Contractor Inc. is a family owned and operated business that have been serving Fairfax with pride for more than four decades.
