Article published on December 5th 2011 | Home Improvement

Welcome to Single Story Extensions- Single story extensions alleviates much of the hard work and most of the problems associated with the old style Single story extensions and single storey base construction, but still provides a safe, strong and firm foundation for your building extension. The only foundations required are a number of concrete pads placed at strategic points around the base. This means far less excavation work and waste material to dispose of compared to other methods of base construction. The Steel Base System is also very quick to install. An average base and wall can be installed in less than one day!

We are really pleased with the finished product, the hardwood conservatory is great quality and we are delighted with overall finish of the conservatory and conservatory steel base. The access to our garden was very taxing, with a 3.5m back wall and no side access, lifting materials over and getting rid of all the waste was no mean feat, but CSB dealt with it extremely well.

Having a conservatory UK will add an extra dimension to your home and your lifestyle. An extra room for dining, for the children to play, for entertaining or for just pure relaxation. Youâ€™ll never look back after owning one! It brings your garden into your home and being an to your house extensions brings its very own ambience which is quite separate to the rest of your home.

With so many styles and sizes to choose from you really will have no problem finding the one that suits not only your home but you too, from traditional styles such as Victorian and Edwardian to the more contemporary Pavillion and Gullwing.

Not only an extra room but also an added security measure for your home and family. All of our styles also come with many options, like Celsius performance glazing, plus a 10 year guarantee for total peace of mind. You really will wonder how you ever lived without this addition to your home.
