How to Clean Roller Blinds?

by Blinds Depot

Article published on January 19th 2012 | Home Improvement

Roller blinds are good options in terms of window decoration. They provide an elegant appearance to your home or office. One of the vital facts about roller blinds is that they occupy least space. One of the main reasons for the popularity of these blinds over curtains is that they are easy to clean and look stylish too. Roller blinds come with easy operation mechanism. To ensure good looks and smooth functionality of the blinds it is important to clean and maintain the blinds regularly. This can be achieved with minimal efforts and time. You can clean a roller blind using a damp cloth.

Lot of dust or grease are deposited on the roller blinds whether it is installed in the kitchen, bathroom or office. Cleaning the blinds effectively is important to ensure that they look good and offer good services for many years to come. The roller blinds should be cleaned at regular intervals. Cleaning the blinds regularly will eliminate the extra costs behind repairs. Cleaning the blinds also assures that you live in a healthy and hygienic environment. There are many options for cleaning the roller blinds, but it all depends on the type of blind you use for home or office. Different types of materials require different types and degrees of cleaning. Make sure you use a soft cloth while cleaning the blinds. Ultrasonic cleaning is also a good option as it is specially created for cleaning the window blinds and makes sure that they are free from dirt for at least three years.

When you are looking to clean the roller blinds yourself take proper care of the blinds. Make sure they do not bend or twist hampering their operations. Chemically treated dust cloth is also a good option. Use the brush attached with the hover to vacuum clean the roller blinds. Hot water should not be used to clean the blinds as it can prove detrimental for the materials used in the blinds. In order to dust the blinds regularly and stop dust accumulation on them you can use the feather dusters too. You can also read through the cleaning instructions provided by the blinds manufacturers. These are easy to follow and provide the best course of action.

The roller blinds have to be removed and placed on a plain surface when you are looking to clean them with soap water. Rinse the blinds thoroughly and wipe them well to make the blinds dry. There are many cleaners available in the market. While choosing a cleaner make sure it does not have any harsh chemicals. Chemicals can degrade the fabrics in your blinds. Natural products are best in this regard. It is best to maintain the roller blinds regularly. It takes only a couple of minutes to dust the blinds. If there is no dust accumulation you will not have to spend much time in thorough cleaning.

Most experts would advice on cleaning the roller blinds daily and thorough washing once in a couple of weeks is needed to ensure best health of the blinds.
