Light Up Your Home with Exterior Pot Lights by Electric Ald

Article published on January 3rd 2012 | Home Improvement

If you want to install lights in your home, exterior pot lights would be great addition to any kinds of house whether it is small, medium sized or big. These lights are generally installed under the eaves of a home so they will stay dry during snow and rain. Exterior recessed lights are manufactured to handle moisture and some that will withstand the rain as well as other weather elements. These lights come with sealed pack and it should be installed professionally under supervision of a reputed electrical contractor who has been providing installation of these lights successfully for many years.

A house with pot lights on the exterior of the building will illuminate the whole structure of the home and make it more inviting for the peoples who visit or drive by. It can be installed every couple feet around the top of a house and along the sides near a window. These lights will add the special feelings of welcome for the guests, family or friends not only at special occasions but all the time. It is also very helpful for security and safety perspective. Exterior recessed lights have directional light bulbs which can be directed towards a window or a door. Having a light trained on a door or window will help to illuminate all areas in the house premises. This will ultimately helps police and experts on crime to use it as a deterrent for burglaries.

Many insurance companies offer substantial discounts for safety upgrades to a home. A home owner should also contact their insurance service provider after proper installation of pot lights and ask them eligibility of discounts on a safety level for their home. Installing exterior pot lights is a major improvement in safety and can help a homeowner to gain a discount on their yearly or monthly premiums. These lights not only ensure safety of a house but also add to the value of a home if homeowner will sell the home. The real estate market is very unstable across the globe and a slight change in the home in terms of installation of modern lighting; a repairing work etc. will drastically increase its worth.

Pot lights can also be placed with the timer to go on at dusk and go off at dawn in order to save energy. Moreover, it can also be placed on a motion sensor plate in key areas around the house like in the front yard or near the driveway.
