Picking the Right Pool for Your Backyard by Editor123

Article published on December 28th 2011 | Home Improvement

It has become extremely affordable and easy to get an in-ground pool installed at your backyard. If you are interested in owning a pool to have fun with your family and friends, there are three kinds of in-ground pools that you can choose from. They are - concrete pools, vinyl lined pools and fiberglass pools.

About Concrete Pools

The best part about concrete in ground pools is that they can be custom-built, as per your requirements. In fact, they can be built-in almost any shape and size of your choice. These pools are also referred to as Shotcrete or Gunite pools as the installers make use of a gun for shooting concrete onto the surface of steel-reinforced walls. Companies that construct swimming pool in Toronto can install a concrete pool in about three to twelve weeks. Though it takes longer to install such kind of pools, but they are considered as most durable and strongest type. And unlike its counterparts, concrete pools can be easily updated, enlarged and remodeled.

About Vinyl Pools

Preformed flexible liner is used in the manufacturing of such pools. Non-corrosive polymer, aluminum or steel is used for making a reinforced wall frame and the liner is attached to it. Such pools are usually rectangular, but you can also opt for L-shaped. Companies that build swimming pool in Toronto offer their customers with a wide range of colors and patterns to choose from. If you are interested in vinyl pools then it is important to know that sharp objects, pets and pool toys might cause harm to the liner. Though such problems can be fixed, it is always good to be a little careful. Installation of such pool might consume about one to three weeks.

About Fiberglass Pools

Fiberglass pools are ready-to-use and just need to be placed in the excavated area. However, if you are interested in getting a fiberglass swimming pool Toronto, you might have very few choices to pick from. These pools come in limited shapes and sizes as handling such massive objects isnâ€™t easy. You can rely on the expertise and knowledge of your local in-ground pools contractors for picking the right option for your backyard.
