# Remove the toughest stains with non-toxic all purpose cleaner by Brad Siamons

Article published on June 21st 2012 | Home Improvement

Through the hustle and bustle of our daily routines, ultimately we want to come home to a clean house. What most people donâ€™t realize is that when your home is free of germs and messes, it can actually decrease stress levels and improve your overall health.

Whether itâ€™s a tough wine or pet stain on your carpet, calcium and lime deposits in your bathrooms or just the general bacteria that accumulates in your homes from everyday life, itâ€™s important to use products that are safe for you and safe for the environment. You shouldnâ€™t be forced to use toxic chemicals with a skull and cross bones on the label just to clean away everyday stains in your home. You should have the option of using cleaners that are safe for your family and your home. The Gloves Off line from Planet People is the perfect solution to this problem. Gloves Off is a line of heavy duty, environmentally friendly cleaners thatâ€™s tough on stains but safe for your family. This line of cleaners includes Gloves Off Tough Stain Remover, Gloves Off Calcium, Lime & Rust Remover, Gloves Off All Purpose Cleaner & Disinfectant and Gloves Off Triple Action Carpet Care â€“ all made with non-toxic ingredients that are safe for your family and the environment.

Whether thereâ€™s one person living in your home, or five, stains are inevitable. You can try your hardest to keep up with cleaning routines, but in the end, accidents happen and itâ€™s nice to know that thereâ€™s an eco-friendly solution to tackle your toughest, greasiest mess. Gloves Off Tough Stain Remover is great on a variety of surfaces and materials to remove wine and pet stains, soap scum, permanent market, baked on oven grease and even adhesive left behind from stickers. Gloves Off works hard to lift the stains off the surface so you can easily wipe them away. That means you spend less time scrubbing and more time relaxing.

Calcium, lime and rust are other problems that we commonly find in our sinks, bath tubs, toilet bowls, and shower heads and on glass, stainless steel and appliances. Most of the products available in the market to combat calcium deposits are toxic and corrosive and definitely not the type of product you want your family to come in contact with. Gloves Off Calcium, Lime & Rust Remover can help remove those tough, stubborn stains in your bathrooms and kitchens without any harmful chemicals. Gloves Off is made with only non-toxic ingredients, it is non-corrosive, non-irritating and doesnâ€™t have any of those harsh fumes like the leading competitors. Gloves Off Calcium, Lime & Rust Remover is excellent to remove the toughest hard water stains in your home without being harmful to your family or the environment.

Lastly, if you have children or pets, itâ€™s probably really important to you to have your home, clean, organized and germ free. Sometimes antibacterial products can do more harm than good, killing 99.9% of germs but leaving behind toxic residues that are just as bad, if not worse for your family. If youâ€™re looking for a product that cleans and disinfects without any harmful chemicals, Try Gloves Off All Purpose Cleaner & Disinfectant. Gloves Off Disinfectant is made with thyme and oregano oil â€“ natural, botanical ingredients to kill 99.9% of germs, making it safe for your home, and for the environment.

Itâ€™s important to choose a cleaner thatâ€™s safe for your home and your family. You want something thatâ€™s going to get the job done without leaving behind toxic chemicals or harsh fumes, and without giving up on performance. The Gloves Off line is great for all kinds of messes in your home without being harmful to you or the environment. So next time youâ€™re in the store, choose a cleaner like Gloves Off that doesnâ€™t feature a skull and crossbones on its label. Youâ€™ll have a cleaner, safer hor and more peace of mind.
