Thinking of extension, think of Orangery by [CharlesChristianson](#)

Article published on January 18th 2012 | [Home Improvement](#)

If you are planning to give your home a beautiful extension, then you have come to the right place at a right time. Orangery is a great solution to extend your home and gift your family with a wonderful place to live in. Home extensions are basically made to increase the living space and add an extra room for some specific purpose. Orangeries offer an ultimate solution to the space requirement and also provide a standard living space. They connect to the existing home and blend with it.

Orangeries were actually built with a purpose to grow citrus fruits during winters. They became popular due to the aroma they carried inside them. It became an enchanting place to sit in and sip tea. They are born again with a new purpose but same name. Now orangeries are meant to add extension and a classic living area to houses. They are made up of bricks and mortar. The custom designed roofs and the unique side elevation style made them stand apart. The most outstanding factor of this luxurious structure is that they are shiny and filled with simmering sun light that descends from the roof and windows making the atmosphere inside it comfy and warm.

The design of orangery can be modified to suit any need or specification. Suppose if orangery is meant to be used as a dining room then it has to be connected to the kitchen. This can be achieved by installing a door that leads to kitchen through a hallway. Or if you want it to be used as a greenhouse then make sure the doors are broad and large enough to allow easy transportation of plants and shrubs. The best you can make out from an orangery is a living room. Relaxing, reading, watching TV or simply lying are some of the activities that you would love to get indulged in while enjoying the shower of natural light. To enhance the ambience an orangery can be equipped with some accessories like central heating system, air conditioners or a hot water tub if you are little wild and creative.

Orangeries have gained much more popularity in recent years due to their outstanding exteriors and looks. They can be designed in various colors and patterns like creamy-white, green or black. It is not merely an extension but a standalone structure that reflects luxury and comfort. All this and more is available at really affordable rates. If you are planning to build a glasshouse, orangery or even a conservatory then visit orangeryuk the leader in orangery designs now. Have a glimpse at the case studies and gallery to admire some of the best designs in industry.
