Twilight Master Spas and Health by [Sam Rutter](#)

Article published on April 4th 2012 | [Home Improvement](#)

When choosing a spa or hot tub, many people focus on the look and visual design. While the appearance of the hot tub should certainly be taken into consideration, it is not the most important factor. It is easy to overlook key elements such as filtration systems, insulation, and sanitation technologies.

The Twilight Master Spa series is an innovated hot tub product line, combining various improvements within the spa industry into one easily customizable spa. One of the most notable innovations is the eco pur filtration system. The eco pur is a mineral based purification system, patented by Master Spas and installed into the Twilight series spas. This type of filtration system will cut back the amount of chemical sanitizers you need to use by a considerable amount.

The Twilight Master Spa is also utilizing top of the line insulation technologies. A combination of eco-friendly spray foam and a wrap provide a superior insulation system, made to keep the heat inside your hot tub, therefore reducing the amount of energy needed to keep the spa up to your desired temperature. Twilight Series spas also include top of the line hot tub covers to protect your water from the elements. This also adds to the insulation value.

Ozonators are one of the best ways to safely sanitize hot tub water without the use of harmful or damaging chemicals. Using an ozonator in a hot tub cuts down on the amount of chlorine or bromine needed by a considerable amount. Twilight master spas all include an ozonator installed into the plumbing. When used in conjunction with an eco pur filter, the amount of chlorine needed can be reduced by up to 85%.

Of course it is important for a spa to be visually attractive. The Twilight Master spas incorporate appealing designs with top of the line technologies to create the best spas on the market. A wide range of acrylic colors and skirting options make it easy to tailor a Twilight spa to fit into your personal backyard's design. It is easy to incorporate a matching cover, steps and other spa accessories to complete your purchase.

You do not need to compromise quality when choosing your hot tub. The Twilight Master Spas allow you to pick an appealing design and incorporate your desired colors, all while providing the best technologies available. Energy efficiency, advanced filtration and top of the line sanitation systems combined with elegant and visually attractive design properties make the Twilight Master Spa the best spa on the market.
