Use hand dryers instead of old fashioned paper towels by [Nick Kandola](#)

Article published on August 10th 2012 | [Home Improvement](#)

Today, if we talk about the major problems of the world that will affect the life of everyone living in this planet. The problem is global warming, which is getting increased by the level of carbon dioxide in the environment. You may discuss about global warming, the effects of an oil leak on natural resources, the problem of melting ice caps, diminishing fossil fuels and pollution levels, but have you ever noticed what you are contributing in all of it. Travelling through public transport, less use of the car, and saving energy by switching off the lights are not much an effort in saving the environment, having an Eco friendly washroom is one the best way to show that you care.

The environmental savings can be best done by saving the trees and natural resources. Think about the paper towel, that you use after hand wash and the manufacturing of it will create so much of pollution. Even water is heavily used in the overall process to create the paper towel. The technology has been developed that you can dry your hands without using the paper towel or a piece of cloth. Today hand dryers are being used everywhere to dry hands. Hand dryers use very little electricity. If you are in a good shopping mall and using the washroom, then you have noticed that there are using hand dryers instead of paper towels. Hand dryers are Eco friendly and less costly as compared to paper towels.

Hand dryers are to be picked if you want something that will be simple to use and can pretty much take care of itself with nearly no repairs required by the customer. But with paper towels you need somebody to refill the towels. While using the paper towel you will get germs that are on the towel arrived from many different ways. But if you use the hand dryer then there is no chance to get germs back. The air pressure of the hand dryer will clean your hands effectively.

There are many types of good hand dryers available in the market that will reduce your paper towel cost and they are environmentally friendly too. The airforce hand dryer is most popular among all of them. The technology behind this hand dryer is the best. They are safe and secure to use.

The hand dryers dyson ab01 and dyson ab03 are also manufactured with the same technology which will give you an eco-friendly washroom. These high speed hand dryers dry your hands in 10 seconds and consume less energy.
