Use Only the Best Roofing Services by Ken Ward

Article published on February 10th 2012 | Home Improvement

Your roof is the greatest asset and first guard against the elements entering into your building. This includes wind water sunlight and heat. When you want to replace your roof or want to make some necessary repairs, you should call to roof services. Roof services provides you highest quality roofing installation and repair solutions for residential and commercial customers, roofing services provides you roof flashing repair, roof valley repair, tile roof repair, Commercial flat roof repairs, Ridge vent repair, Skylight repair, Professional Roof Repairs Done with Efficiency, Roof Replacement, Siding repair.

In a perfect world companies that advertise professional roofing services would give you exactly what you paid them to do. We have been called many times by home owners needing a roofing company that really knows what to do to fix problems left behind by an inexperienced roofer.

Unfortunately there are individuals that advertise roofing skills but they are little more than a handyman service. A highly skilled roofer does one thing only â€“ take care of roof problems. We had a case where a customer nearly lost the entire ceiling of his upper floor loft because so much rain was leaking through the attic.

When we inspected the roof, we discover the ridge vent had been installed without enough fasteners. You all know how the Virginia (VA) wind can blow. The ridge vent had been lifted almost totally off the roof by the wind, tearing up shingles from the entire length of the roof. Upon closer examination we saw it had been attached with only four screws â€“ two on each end. It was unbelievable.

How the ceiling did not cave in we donâ€™t know, because it was waterlogged to say the least. We removed the damaged shingles, fastened the ridge vent securely in place. After replacing the shingles we sealed everything so well we knew the roof would have to blow off before it would leak again. Make sure the company you call for roofing services know what itâ€™s doing. Youâ€™ll save a grea deal of aggravation.
