Article published on March 9th 2012 | Home Improvement

The concept of furniture has changed tremendously in recent times. Manufacturers and designers have to keep in mind the latest trends to allure customers. There is wooden, metal and plastic furniture. Cane furniture has made a remarkable place for itself in the market. It is also known as rattan furniture. Cane is created from the stems of bamboo shoots or vine. Here is what makes cane furniture so special:

Beauty: outdoor furniture is aesthetic and attractive. It is ideal for outdoor usage as well for indoors. It is used to make tables, chairs, sofa sets, and dining tables. This type of furniture is considered as ideal as it can bear toughest weather conditions and is water resistant. It enhances the look and turns shabby drawing rooms or bedrooms into one of a kind. It comes in various styles and colours.

Durability: Such furniture is considered durable apart from being stylish. It provides strength to the backs or seats of chairs and sofas. It is resistant to water. The furniture made up of cane lasts longer than others, which means that it helps in better investment. The sofas and chair provide a level of comfort to users. Because of its light weight, cane is easily portable and manageable.

Environment friendly: Furniture made by cane is an excellent choice for those who believe in being eco-friendly. Cane does not require any sort of chemical for its beautification and it is a renewable product. It can be re-planted and do not harm the environment. It is known as conservatory furniture.

Maintenance: Avoid keeping rattan furniture the direct sunlight or heat. Extreme heat conditions can make it dry and brittle. Use lemon oil, orange oil to a high-oil content furniture polish. Be seated on cane seats in such a way that your weight is evenly distributed on them. Avoid storing cane or wicker furniture in high humidity areas. Your furniture must get an adequate air circulation.

Cane is cost-effective and one can afford the furniture easily. To give a unique and innovative look to your sitting area, try cane furniture.
