Why use Roof Trusses for a self build property by Julia Roger

Article published on January 9th 2012 | Home Improvement

Top quality roof trusses are an important part of self build homes, without sturdy trusses projects would grind to a halt. The Roof Trusses have to be reliable, they need to be totally dependable and the quality of the trusses canâ€™t be compromised if the build is to be a total success. Obviously the Roof Trusses have to be made from the finest of materials, namely top grade timber thatâ€™s hard wearing and long lasting. In fact, only the highest quality strength graded Roof Trusses should be used to satisfy the demands of different types of builds.

Thatâ€™s where the expertise of timber frame craftsmen comes to the fore; they supply Roof Trusses that are tailor made to suit all types of client demands.

Opt for proven products for self build homes

Prefabricated roof trusses are manufactured for individual projects and each individual design caters for unique client specifications. The Roof Trusses are sturdy, strong and durable, made from timber members that are joined together with top specification metal plate connectors.

On each unique project the design of Roof Trusses plays an important part and they are brought to life using advanced CAD software. Contact manufacturers that make the finest Roof Trusses and theyâ€™ll work alongside you at every stage of the project to ensure you receive trussed rafters of the very highest order.

The benefits of roof trusses

There are a couple of reasons that developers and builders of self build homes use roof trusses to frame a roof on a new build project.

The main benefit is cost. Roof Trusses are a highly economical way to add a roof frame. Then thereâ€™s the speed in which Roof Trusses can be erected on site, theyâ€™re a quick to install solution thatâ€™s suitable for a wide range of structures. Plus thereâ€™s the sheer amount of choice you get from Roof Trusses as well. All styles and designs are available from King and Queen post Roof Trusses to Fink and Howe designs.

Whatâ€™s more, Roof Trusses come in all spans and pitches and they are a pivotal part of any self build project.
