When people think of car security and surveillance, they prefer to install GPS and Car Camera to safeguard their vehicles. On the other hand, there are several other camera devices and surveillance systems are available in the market to perform duty of surveillance and monitoring of your personal car or fleet of cars or other HTV™s. Car cameras are designed to record all the video from your car and they are plug and play based, so you can directly attach it to your car's lighter and mounted right on your dashboard. These lightweight cameras are capable to produce high quality images and recordings, and can protect you from unfair insurance claims.

Benefits of Car Camera

These include:

• Capturing proof of all driving and activities on the road

• Backup evidence to provide to insurance companies

• Evidence for law enforcement agencies

Car Camera can be installed within no time and do not require any modifications to your car's interior. Car camera is a new technology introduces for the sake of security and better monitoring of your feet movement, this technology is really benefits for those professionals who belong to the industry of transportation, and cameras make them feel comfortable and relaxed by keep on monitoring their vehicles to avoid any panic and security hazards. Car Camera are really helping and sorting the issue regarding security and surveillance.

A Spy Cams is a type of micro DVR which is built into a deceptive package and made to resemble a small object, such as a key fob, wristwatch or lipstick case. Known by numerous terms such as cam stick, gum cam, thumb cam, etc., these devices will often function according to their apparent purpose, as in a pen cam that actually writes. They are often very cheap mini electronic devices with great flexibility. Spy cams are very useful electronic device to record the information which is likely to be useful and important for the authorities, mostly such devices are used by law and enforcement agencies to track the record of unforeseen activities and control through power of moderate technology of video tracking.

A typical spy cam is powered by a rechargeable lithium ion or lithium-ion polymer battery and has small colored LEDs to indicate its operational status, and is controlled by buttons on its surface. It may also have a slot to mount micro SD flash memory card to expand its recording capacity up to several hours. In order to offload the recorded video, it can be connected to a computer's USB port to download or move recorded data to your computer system. Another important advantage of spy cams is that they are not noticeable. After all, the main purpose of your surveillance is to capture bad practice and events that occur in your immediate surroundings. The problem with security cams is that they are in bare view whereas spy cams are not easily noticeable that's why spy cams are more efficient and effective than of other cam devices. When people know that they are monitored via security cams installed in their vicinity, they act normal. Without a security cam in the picture, one will be able to see the real stuff. That is why having a spy cams is much more beneficial. People will think they are not being monitored but spy cams allowing you to see their real nature.

A Spy camera is a video camera used to film people without their knowledge. The camera is "veiled"

because it is either not visible to the subject being filmed, or is masked as another object. Spy cameras have become popular for surveillance, and can be built into common objects such as smoke detectors, clock radios, motion detectors, and cell-phones. Spy cameras may also be used commercially or industrially as security cameras. The major purpose of spy camera is to perform security and monitoring activities.

Spy camera can be wired or wireless. The former will be connected to a TV, VCR, or Digital video recorder (DVR), whereas a wireless camera can be used to transmit a video signal to a receiver within a small radius maximum up to 100 feet. There are wide range of spy cameras available in market according to your wish and will, spy camera are not only meant for commercial usage but also useful to provide better surveillance circle around your residence.
